

Top 5 Reasons to Use Handcrafted Soap

1. Handcrafted soap blends science with art, intersecting past traditions with present-day methods. Timeless, simple, straightforward soap.
2. Most handcrafted soaps are made of cooking-quality ingredients, such as olive oil, shea and cocoa butters, seed extracts, botanicals & essential oils.
3. Glycerin, a natural byproduct of the soap making process, moisturizes the skin. Most commercial soap manufacturers remove the glycerin. Handcrafted soap makers leave the glycerin in the soap, for a mild and gentle cleanse.
4. Handcrafted soaps are made in small batches, carefully supervised by artisan soap makers. Their commitment to quality is evident.
5. Handcrafted soaps are cruelty free and many are vegan. They do not contain detergents or phosphates, so are better for the environment than many commercially-produced products.
